E-mail:

Dear Editor

I, _____, the corresponding author of the manuscript, am enclosing herewith a paper entitled _____ for publication on **PERÍODICO TCHÊ QUÍMICA**.

With the submission of this manuscript, I would like to undertake that:

- All authors of this research paper have directly participated in the planning, execution, or analysis of this study;
- All authors of this paper have read and approved the final version submitted;
- The contents of this manuscript have not been copyrighted or published previously;
- The contents of this manuscript are not now under consideration for publication elsewhere;
- The contents of this manuscript will not be copyrighted, submitted, or published elsewhere, while acceptance by the Journal is under consideration;
- There are no directly related manuscripts or abstracts, published or unpublished, by any authors of this paper;
- My Institute's representative is fully aware of this submission. **Name of your Institute of Faculty:**
- **ATTENTION: ETHICS COMMITTEE APPROVAL ON RESEARCH WITH HUMAN OR ANIMAL PARTICIPANTS**

Research on human participants, which includes identifiable human material or identifiable data, requires ethical protection. According to the ***Declaration of Helsinki*** issued by the World Medical Association, research on human participants should be clearly formulated in experimental protocols and submitted to independent ethical review boards (ethics committees and institutional review boards) for approval. Additionally, every potential participant should be informed about the "aims, methods, sources of funding, any possible conflicts of interest, institutional affiliations of the researcher, the anticipated benefits and potential risks of the study and the discomfort it may entail" and should give consent to participate.

- **Authors are required to describe in their manuscripts ethics committee approval and participants' consent by study design from participants when research involves human participants.**

Ethics approval must be sought for research involving human participants.

A 'participant' is someone who:

- Actively provides research data. For example:
 - ✓ Completes surveys
 - ✓ Participates in interviews, discussions or observations
 - ✓ Undergoes psychological, physiological or medical treatment or testing
 - ✓ tests software
 - ✓ Grants access to personal collections of records, photographs, etc.
 - ✓ Is the person from whom tissue has been collected (including blood, urine, saliva, hair)
 - ✓ Is identified in a record, e.g., employment record, medical record, education record, membership list, electoral roll or
 - ✓ Is identified or de-identified in data banks or unpublished human research data, e.g., analysis of existing unpublished data collected by another researcher or collected for a different research project.

- **Authors must describe the Animal Ethics Committee approval when the study is carried out using animals in their manuscripts.**

Animal Ethics Committees (AECs) provide avenues for public participation in regulating animal research. AECs are responsible for approving and monitoring research within Accredited Animal Research Establishments, including administering animal and facility inspections.

No animal research may be carried out without AEC approval. AECs must consider and evaluate applications to conduct research based on the researchers' responses to a comprehensive set of questions, including their justification for the study, its likely impact on the animals, and procedures for preventing or alleviating pain and distress.

On behalf of the establishment, AECs can stop inappropriate research and discipline researchers by withdrawing their research approvals. They can require that adequate care, including emergency care, is provided for animals. They also provide guidance and support to researchers on matters relevant to animal welfare through means such as preparing guidelines and disseminating relevant scientific literature. AECs are responsible for advising establishments on the changes to physical facilities that should be made to provide for the needs of the animals used.

Does your research is based on human or animal participants?

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

If YES, please provide the Animal Ethics Committee Approval Number or Ethics Committee Approval and patient consent by study design

.....

.....

Will you require a letter of acceptance?*

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

* The letter of acceptance is an **optional service** of the Journal. If the authors need a document in advance (prior to the publication date) to prove that their article has been double-blind peer-reviewed and accepted for publication, they may **request, upon payment of an additional fee of USD 250, an acceptance letter for publication of the article.**

NOTE 1: THE LETTER OF ACCEPTANCE may be issued **if, and only if**, the article has undergone a complete double-blind peer-review and is considered **ACCEPTED** for publication. Letters will NOT be issued for newly sent articles that have not yet been appropriately evaluated and peer-reviewed.

NOTE 2: The Journal does not agree with the trade-in documents that can attest to the publication of articles that have not gone through the due process of double-blind peer-review and are legitimately considered approved for publication in the subsequent edition.

NOTE 3: THE LETTER OF ACCEPTANCE may be revoked at any time if, concerns about the manuscript emerge.

The submitted manuscript is a **(Select one option with a cross in the appropriate box)**

Any Other (Please specify)	

Any Other (please specify)

Please, select the boxes below with a cross after reading and understanding the conditions. It is mandatory to select both boxes.

I am aware that the Journal does not provide ahead-of-print publication. Therefore, I will not share any preprint before printing the Journal.

I am aware that the Journal may review my manuscript at any time before publication and postpone or exclude it if concerns are raised regarding the authorship, authenticity, or other undesirable issues that may occur.

I am **aware and agree** that the Journal may publish the evaluation (desk review or peer-review results) of my work. This procedure aims to provide quality control samples. The publication will include the names of the authors, the manuscript title, and the country of origin.

I want to support the work of the journal with a donation. Please let me know how to proceed. **(this field is not mandatory)**
